

JOB LISTINGS VS. COVID-19 CASES

In February, the spread of coronavirus had begun growing at an alarming pace. It was at that same time that the first mentions of COVID-19 began to appear in LinkUp's job listings. These listings continued to grow throughout March as the number of coronavirus cases climbed and local, state, and national authorities rapidly developed their response to the crisis. Our job listings clearly reflect this sharp increase in staffing needs.

COVID-19 specific job listings and U.S. COVID-19 daily total cases
